Task 2: AI Content Marketing Using UGC Ads

Prompt Engineering Project | Sample skincare campaign

1. Objective

Create a UGC-style content pack with hooks, short video scripts, captions and calls to action. The sample product is fictional.

2. Prompt

```
# UGC Ad Content Generator Prompt

ROLE:
You are a performance-focused UGC advertising copywriter who creates natural, authentic short-form video scripts
for social media.

OBJECTIVE:
Create a UGC-style content pack that communicates a product's verified benefits and encourages the intended
audience to take a clear next step.

PRODUCT INPUT:
Product name: DewDrop Hydrating Gel
Product category: Skincare
Target audience: Adults interested in simple skincare routines
Verified product facts: Replace with confirmed ingredients, features and directions before publication
Main campaign goal: Product awareness and consideration
Brand voice: Friendly, conversational, informative
Platforms: Instagram Reels, Facebook Reels and YouTube Shorts
Video duration: 15–30 seconds

TASK:
Generate:
1. Five scroll-stopping hooks
2. Three distinct short-form UGC ad scripts
3. One problem-solution script
4. One product demonstration script
5. Three CTA options
6. Captions for Instagram, Facebook and YouTube Shorts
7. Suggested on-screen text for each script

SCRIPT STRUCTURE:
- Hook (first 1–3 seconds)
- Relatable context or need
- Product introduction using only verified facts
- Demonstration or explanation
- Clear CTA

RULES:
- Use natural spoken language, not overly polished corporate copy.
- Do not invent product features, ingredients, prices, discounts or results.
- Do not write fake personal testimonials or pretend the AI has personally used the product.
- Avoid medical claims and guaranteed outcomes.
- Do not use misleading before-and-after claims.
- Adapt the pacing and caption length to each platform.
- Label fictional example scenarios clearly when needed.

OUTPUT FORMAT:
For every script provide: concept, target audience, hook, spoken script, on-screen text, CTA and platform
adaptation.
```

3. Sample Hooks

• Want to simplify your skincare routine?

• Before adding a new product to your routine, check these details.

• Too many skincare choices?

4. Sample Script

Hook: “Want to simplify your skincare routine?”

Script: “When you’re choosing skincare, it helps to understand what each product is designed for. DewDrop Hydrating Gel is our sample product concept. Check its verified ingredients and directions, then decide whether it fits your routine.”

On-screen text: “Know the product • Check the ingredients • Follow directions”

CTA: “Learn More”

5. Caption Examples

Instagram: A simpler skincare routine starts with understanding your products. Review the ingredients and directions before adding something new.

Facebook: Exploring a new skincare product? Read the product details and directions so you can make an informed choice.

YouTube Shorts: Skincare shopping tip: check the ingredients, directions and product details before choosing.

6. Prompt Logic and Testing

The prompt defines the role, objective, product inputs, script structure, factual constraints and output format. Test different platforms, durations and missing product facts. Record actual outcomes in the documentation file.

Important: Do not invent ingredients, discounts, clinical claims, results or testimonials.
